Art Unit: 3634

1. The drawings filed on December 20, 2005 have been accepted by the Examiner.
2. The substitute specification filed on December 20, 2005 has been entered.
3. Claims 1-6,8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not known if the applicant is claiming the security door apparatus per se or in combination with the entrance door. While claim 1, line 1 recites "A security door apparatus for an entrance door" and thereby sets forth that the claims are drawn to the security door per se, lines 5-6 compare the dimensions of the auxiliary door with that of the entrance door and lines 10-11 state that the auxiliary door is mounted on the door each of which can only be an accurate recitation if the entrance door is a positively claimed invention of the invention. Likewise, the dependent claims structurally relate the auxiliary door with the entrance door. Elements of an invention to which it is necessary to refer in order to define other elements of the invention are to be positively included in the claims. It is readily evident that the applicant's invention relies upon the combination of the auxiliary door with that of the entrance door and as such the claims are to be amended to recite this as such.

These claims are further indefinite for they recite "the door" wherein it is not known if reference is being made to the auxiliary door or to the entrance door.

Art Unit: 3634

Claim 8 is further indefinite for lines 4-6 are an improper narration and further attempt to define the dimensions of the auxiliary door with that of a delivered package, wherein, the delivered package is not a positively claimed element.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

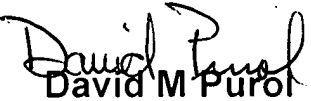

Claims 1-3,6 as best understood are rejected under 35 U.S.C. 102(b) as being clearly anticipated by O'Harrow. O'Harrow discloses a security door comprising an entrance door 11, auxiliary doors 1,2,3 having openings 6,13.

5. Applicant's amendment attempting to clarify the scope of the invention necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
